# Who else offers a money back guarantee?

Mike Potter of Flexo Wash LLC guarantees you'll be pleased with the performance of your new anilox roll cleaning system or he'll give your money back.

*"If you're not satisfied with your Flexo Wash System during your first 90 days of operation, we'll work with you to ensure your satisfaction. If you're still not satisfied, we'll refund your money when you return the equipment."*

Does any other manufacturer make the same offer? Flexo Wash stands behind their equipment because we know it's the fastest, provides the best cleaning results and we're certain you'll be satisfied...and we ensure it with a full money-back guarantee.

**Michael Potter**  
CEO

*"If you're not satisfied,  
we're not either!"*

## Nobody looks at your business like Pitman.

Service is a rare commodity in the printing industry these days. Except at Pitman.

With us, you get a team of specialists with years of experience in the trade. They're also backed by the products and expertise of companies like DuPont\*, Esko, and Toray.

Need a fresh pair of eyes on your project?  
Call Pitman. 1-888-274-8626

## The argument for direct laser engraving.

- Economical • High-speed engraving.
- Simple two-step process. • Easy to use.
- Consistent quality • Simple changeover.
- Error reduction. • Excellent repeatability.
- Quality reproduction over longer flexo runs.
- Designed for flexo, letterpress & dry offset.
  - Environmentally friendly.

The Helios 6010 direct laser engraving system digitally engraves flexo, dry offset and letterpress plates and sleeves in a single system. Best of all, A&V supports these systems with almost 50 years of flexo experience. State-of-the-art equipment and support. That's a hard combination to beat.

With the  
**GAPMASTER**,  
you're on to  
a sure thing

Info-Hotline  
+1-877-FLEX DIE

Kocher + Beck put an end to rigid cutting units. With the GAPMASTER, gap measurements can be precisely adjusted to within a range of +/- 100 µm, in increments of 0.8 µm, simply with a turn of the adjusting dial, even when the machine is running.

As a result, setup time becomes production time.

With the GAPMASTER you can accommodate base materials of different thicknesses and reduce wear on your rotary cutting dies.

**Hate stop and go production?**

Eliminate the stop signs that pop up every time you need to change a roll. Automatic web splicers and turret rewinders from KTI allow non-stop roll changes at full process line speed. Roll changes are a major source of downtime for web fed operations; eliminating that downtime increases efficiency, reduces material waste and increases profits.

**KR Series Turret Rewinder**

KTI offers superior tension control by offering optional spindle drive systems up to and including an individual servo motor on each spindle.

**DO YOUR MATTE COATINGS  
LOOK LIKE THIS?**

The majority of  
matte coatings  
settle on press  
and in the container.

UVitec has designed  
a new matte coating  
that has very low gloss  
and will not settle.  
**Why should you settle for less?**

Contact UVitec to find out more about  
our new matte coating (22602-87)  
and our complete line of  
other versatile coatings.
