*Rum Jungle Tanning Lotion*

### THIRD PLACE

McDowell Label and Screen Printing,  
Plano, Texas

*DC Wash Herbal Body Wash*

# Polyart®

The *agentic paper*

## FOR ALL YOUR TAG AND LABEL NEEDS

### TAG? WE'RE IT!

Polyart® can easily be perforated, varnished, scored, foil stamped, folded, stitched, and more, using standard converting equipment.

### LABEL US VERSATILE.

Resistant to tearing, water, and a range of chemicals, Polyart® has no grain direction, allowing it to conform easily to irregular surfaces and container shapes. Polyart® is excellent for bar code applications and provides smudge-resistant thermal transfer prints. Non pressure sensitive Polyart® is available directly to you, the narrow web converter. Polyart® is also available through your preferred pressure sensitive manufacturer.

Ask about our amazing IML grade  
films, used extensively for labelling  
in the blow mold industry!

*Miller Lite MLB Promotion SSL*

## LABELS—OFFSET (PROCESS)

### SECOND PLACE

Hammer Packaging, West Henrietta, N.Y.  
*Eden Garden for Lake Valley Seed*

explore **UV**

## Energy-efficient UV systems

Innovative, highly efficient UV curing systems offer an extremely high curing output combined with very low energy consumption. The totally new BLK®-5 and the MBS®-5 UV systems have incorporated the latest innovations in UV technology, which lead to a notable reduction in operating costs and therefore more cost effective production for a comparatively low investment.

The BLK®-5 has been classified as particularly energy-efficient by the German Professional Association for Printing and Paper Processing and therefore has the label "energy minimized UV-printing".

For an in-depth look at the latest IST UV technology, visit us at **Labelexpo Americas 2008**, booth 5923 or **Graphexpo 2008**, booth 863.

*Balnaves—The Tally*

### THIRD PLACE

Collotype Labels, Adelaide, Australia  
*Columbia Crest—Two Vines*

# It's not magic. It's Flexo Wash.

Only Houdini could get this ping pong ball to fit into a thimble! The same theory applies with media blasting: it's impossible to fit even the finest media into the high density line screen cells of today's anilox. To consistently, deep clean anilox rolls, you need a Flexo Wash cleaning system. Using a media blaster won't get the job done, especially on higher resolution line screens. Our technology has proven to do the job consistently and quickly. All without worry of premature cell wall damage caused by a media blaster's impact on the roll. Call us for references.

And ask about our money-back guarantee. If you're not satisfied with the performance of the Flexo Wash system, we'll refund your money. Will any other manufacturer do this?

## FLEXO WASH

## Schober Rotary Converting Systems and Modules.

Versatile, precise and efficient!

You will be surprised when you find out what our rotary converting units and systems can do ■ Laser contour cutting without physical wear and without the requirement for custom design tooling ■ Ultrasonic welding of composite materials with reduced energy consumption and without the need for hot glue ■ Sealing and embossing of different materials such as magnetic tape, hot foil, holograms (counterfeiting and product piracy protection) and security tags ■ Punching for print, packaging, hygiene and pharmaceutical products ■ Cut & Place transfer and precise placement of pre-cut materials onto a continuously moving web ■ Gluing for a broad variety of applications ■ Scoring and grooving for paper board, filters, non-wovens and fuel cells. More than 50 years of diversified know-how to develop a custom solution for you. **Ask us – we provide consulting service – worldwide.**
