SCIENTIFIC UV MEASUREMENT

HAND-HELD RADIOMETER:

- Accurate measurement of UV output
 - for quality control, energy reduction and condition monitoring
- Precision engineered probe and lamphead docking station
 - for quick and repeatable measurement.
- USB interface
 - for exporting to MS Excel and automatic graph plotting.
- Internal memory
 - for storing results for up to 16 lampheads.

High efficiency at constant quality

The IGT F1 Printability tester for Flexo and Gravure inks

IGT printability testers enable the various factors adversely affecting printability to be evaluated and eliminated before production starts.

FLEXO & GRAVURE

- Colour consistency
- Colour matching
- Density
- Determination of coverage
- Wear resistance
- Scratch resistance
- Flexibility
- Adhesion and gloss
- Ink transfer, etc.
- ISO 2834 & ISO 2846

• High reproducibility • Easy to clean • Simple to operate • Consistent results

Taking cost reduction to a new dimension

The totally new MBS®-5 UV system has incorporated the latest innovations in UV technology, which lead to a notable reduction in operating costs for a comparatively low investment.

- 30% reduction in incoming power with greater efficiency
- Revolutionary heat management with increased print quality
- Reduction of exhaust air consumption
- No compromises in quality or productivity

Speak to our experts and learn more about the MBS®-5 – the economical revolution in UV curing!

more than UV
